CERTIFICATE OF EMPLOYMENT

This document certifies that **Sam Rahnemayan**, born on [REDACTED], was employed by the company autonomy sàrl as **Robotics Engineer Intern**, from July 8th 2024 to January 1st 2025 (6 months). Mr Rahnemayan was assigned the following missions:

- Mechanical design and realization of a soft instrumented foot sole able to measure ground reaction forces
- Add a Bluetooth communication channel on the instrumented soles
- Develop a video game, for the rehabilitation of neurological patients

Mr Rahnemayan has delivered excellent work during the internship at Autonomy Sàrl. He worked successfully on code development, primarily on firmware (embedded controller) and on a the desktop interface based on UNITY platform. The candidate was able to work with a lot of autonomy throughout the project and demonstrated passion and dedication.

During the internship, Mr Rahnemayan was confronted with implementation and concrete problems to solve. While still early in the education of the master, he presented a good ability to address new challenges. His personality was very well appreciated in the team. Calm and quiet, he helped to sustain a good working atmosphere. He is a good listener and followed the advise that were given to him along the internship.

It is more than a pleasure for me to recommend Mr Rahnemayan. His large education in robotics complemented by work experience, is a great asset for any company. For further discussion I am available by phone: +41 [REDACTED].
