Reference Letter for Mr Sam Rahnemayan

TO WHOM IT MAY CONCERN

It is my pleasure to recommend Mr Sam Rahnemayan for a Master thesis in your institution. I supervised his Master project entitled "Virtual environment for rehabilitation for FES and LegoPress". Mr Sam Rahnemayan also followed my 2 lectures of robotics entitled "Basics of robotics for manipulation", and "Robotics practicals". He obtained good grades

Mr Rahnemayan is an outstanding student with different hands-on skills in programming and design. His contributions to our projects have been excellent.

Sam is a person who is committed to his work and is easy and pleasant to collaborate with. He is always volunteering, autonomous, and has integrated very quickly with the laboratory's collaborators and project mates. His relations with his project colleagues are excellent, and has given us total satisfaction.

I am pleased to recommend Mr Rahnemayan to any company or institution looking for a conscientious engineer with an excellent practical sense.

Lausanne, 15 August 2024

Dr. M. Bouri
